**Your  
Software  
Development  
Partner**

PRODUCT MANAGEMENT HARDWARE PLATFORMS LINUX MOBILE

## ABOUT US

**Saber Data** is your premier partner for software development with a dedicated team experienced on a wide range of platforms including mobile (Android, iOS, Windows), Linux and Windows. In addition to our development offerings, we also provide hardware and software integration, resource augmentation, project management / planning, IT management, website services and consulting. Over the years, Saber Data has offered customers in a vast array of industries (including Oil & Gas, Healthcare, Logistics, Gaming, Bitcoin, Retail / Etail, Telecom, Nonprofits) with custom, stand-alone and bundled services to meet their software, hardware, online and IT needs. Contact us today to see how we can help you!

## SOFTWARE DEVELOPMENT

### ► **Business Analysis or Requirements Gathering**

Our consultants are experienced engineers who understand business needs in order to map them into business requirements or requirements specifications. Working with either our own tools and processes or those provided by the organization, our consulting team can meet your analysis and requirement needs.

### ► **Architecture**

Our team members work on both small and large-scale projects in a wide variety of domains, and are experts in state-of-the-art technologies. Let us assemble software architectures to address your business needs - from scalability challenges to mobile multi-platform solutions and more.

### ► **Design**

Whether jumping into an existing project or creating a software design from inception, our team can help. Regardless of the level of the software design project or the requirements already defined, our team can analyze, make recommendations, and improve or implement designs to meet your needs.

### ► **Implementation**

Whether or not business requirements are in place, our staff can supplement development teams or start implementation from scratch. With a wide variety of skill sets (Java, .NET, Mobile, Web, Databases and more), we provide proven development processes and quality assurance based on customer requirements.

### ► **Quality Assurance**

We place a premium on quality throughout every step of every project. With decades of experience, we put together quality acumen that are of the highest standard and establish practices for your teams to follow during subsequent software initiatives.

### ► **Integration with Existing & New Technologies**

Whether building new functionality on top of existing technology, scaling technology or building a mobile strategy, our team does it.

### ► **Migration to New Platforms & Technologies**

Our staff studies, evaluates and recommends new technologies as they evolve. We strive to be your trusted technology partner by developing IT and software growth strategies for you.

## **INTEGRATION**

Our team has experience in not only software solutions, but also solutions that are based on hardware. From telecom solutions to systems and device management, high-performance hardware, custom hardware and more, we will not only help you investigate and build solutions for the future, but help you both support and enhance them as well.

## **RESOURCE AUGMENTATION**

In order to provide the best option based on your needs, our staff members can augment your current projects or develop custom solutions just for you. We can also augment our own talent by partnering with offshore resources at competitive rates to build your solution.

## **PROJECT MANAGEMENT**

After building solutions for decades, our team has project management and planning aptitude you can count on. Based on processes, whether Agile, Waterfall or any combination, our staff can bring expertise in project management and planning to our customers, either as a stand-alone service or one added with other services. By working with multiple domains in all capacities to provide software and hardware solutions to our customers, our team can also provide product management services for any number of products. Our role can be limited to a single release of the product or we can provide ongoing support.

## **IT MANAGEMENT**

Managing IT infrastructure for multiple companies is no issue for our team. We understand IT infrastructure and can evaluate objectives, make recommendations, implement and/or provide services as well as support. We are a trusted IT partner that ensures high-quality infrastructure and facilities are available now and into the future.

## **CONSULTING**

We provide consulting services for any software or combination of hardware and software projects. With decades of experience in a wide variety of domains, Saber Data can help any organization in areas related to software, hardware or IT-based technologies. Whatever your needs or wants - including technology, process or quality assessments - we can help.
